Profile

I am interested in UX and webdesign, and I enjoy reading and learning about new trends and continuously work on improving my skillset. My portfolio includes some personal projects and blog posts which have been completed to further develop my UX and webdesign skills.

I like to challenge myself and learn new things. Moving to England as a 20-year-old was exciting, and brought a lot of learning opportunities, that helped me develop on a personal and professional level.

Key skills

- Build responsive websites with HTML and CSS

- Experience in UX design and user research
